Daniel SIMOEN

Art Unit 1725

Serial No.: 10/678,647

Examiner: Geoffrey S. Evans

Filed: October 6, 2003

For: METHOD FOR MANUFACTURING COMPONENTS CONSISTING OF ONE  
PIECE WHICH APPEAR IN A WEAVING MACHINE

**SUPPLEMENTAL RESPONSE**

To the Director of Patents and Trademarks

Sir:

The applicant appreciates the indicated allowance of claim 5.

Kindly accept the following additional comments from the  
Applicant:

Neither the heddle as described in Fehr et al (US 997,283) nor Ramseier (US 3,628,574) are composed of parts that are produced separately and that can be joined together afterwards. The heddle for the loom harness as described in Fehr et al is made out of one flat metal strip or wire, while the weaving heddle as described in Ramseier is made out of one piece of wire onto which on different places different toolings are done. Consequently, the subject matter of these patents differs sufficiently in order to
